

SHARAD SOURABH JHA

Mobile: +91-8764022027 | Email: jhasharad2711@gmail.com | LinkedIn: Sharad Sourabh Jha

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, SQL
Web Dev: HTML, CSS, Bootstrap, Flask, FastAPI
Databases: MongoDB, SQL
Tools: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, VS Code, Git, GitHub, Arduino UNO, MS Office

TECHNICAL PROJECTS

HR Analytics — Employee Attrition Prediction

[GitHub](#)

Python, Pandas, Scikit-learn

- Performed comprehensive Exploratory Data Analysis (EDA) on the IBM HR Analytics dataset containing 1,470 employee records to uncover key underlying factors driving attrition.
- Implemented Label Encoding and One-Hot Encoding techniques to transform complex categorical variables into optimized numerical formats for machine learning pipelines.
- Trained and evaluated a Random Forest Classifier using an 80/20 train-test split, achieving a model accuracy of 87.4%.
- Diagnosed class imbalance challenges using performance metrics, including Confusion Matrix and Classification Report (Precision, Recall, F1-Score).
- Generated actionable risk-prediction insights to help HR departments proactively identify at-risk employees and improve organizational retention strategies.

E-Commerce Sales Data Analysis Dashboard

[GitHub](#)

Python, Pandas, NumPy, Matplotlib, Seaborn

- Developed a data analysis pipeline to process and clean unstructured large-scale e-commerce transaction datasets using Pandas and NumPy.
- Handled missing fields, anomalies, data type conversions, and optimized memory usage for multi-indexed data frames.
- Performed deep exploratory data analysis (EDA) to evaluate monthly sales growth, top-performing product categories, and customer buying trends.
- Created professional data visualizations (bar charts, line graphs, heatmaps) utilizing Matplotlib and Seaborn to communicate key sales metrics and business insights.

To-Do List Web Application

Flask, SQLAlchemy, Bootstrap, Jinja2

- Developed a responsive web application utilizing Flask framework to handle core backend routing and logic.
- Implemented clean CRUD operations integrated with Flask-SQLAlchemy for structured database updates.
- Designed a user-friendly UI incorporating Jinja2 dynamic templates and Bootstrap for seamless responsiveness.
- Configured secure user authentication and routing protocols using the Flask-Login extension.

PROFESSIONAL EXPERIENCE

Trainee Engineer

Sep 2022 – May 2023

ConsultADD Inc. - Pune, India

- Completed training program focusing on technical operations, agile policies, and procedures.
- Shadowed senior engineers to gain exposure to technical documentation and project management.
- Wrote basic SQL queries to retrieve, filter, and aggregate structured data from databases.
- Collaborated with senior developers on data cleansing using Pandas and NumPy libraries.
- Coordinated data and document transfers while assisting with database syncs.
- Engaged with team members for feedback loops across cross-functional groups.

Embedded System Engineer Trainee

May 2022 – June 2022

Genus Power - Jaipur, India

- Familiarized with microprocessor and microcontroller architectures for system designs.
- Applied fundamentals of microprocessor design, operations, and C++ programming.
- Learned about sensor types, principles, and applications in embedded systems.
- Gained hands-on experience in sensor interfacing and programming for data acquisition.

EDUCATION

Bachelor of Technology (B.Tech) - Electronics and Communication Engineering

2023

Swami Keshvanand Institute of Technology - Jaipur, India (CGPA: 9.01/10)

Higher Secondary & Secondary Education

2019

Shiv Jyoti Senior Secondary School - Kota, India
